Professional Summary

Seasoned Java Developer with 4+ years of hands-on experience designing, developing, and deploying scalable enterprise applications. Strong expertise in Spring Boot, microservices architecture, and modern DevOps practices. Proven track record in delivering high-performance payment and banking systems, including UPI, AEPS, IMPS, and card reconciliation services. Adept at team leadership, troubleshooting complex issues, and implementing robust, secure APIs

Technical Skills

Languages & Frameworks: Java, Spring Boot, Spring MVC, J2EE, Hibernate, REST API
Architecture & Tools: Microservices, Eureka, Spring Cloud Stream, ISO8583, Spring Batch, Agile methodology
Web & UI: HTML5, CSS3, JavaScript, Bootstrap, Angular , React-JS.
Databases: Oracle, MySQL, SQL Developer,mongoDb
DevOps & Testing: API Gateway, Git, Log4j, JUnit, Kafka, Tomcat, Distributed systems, AWS, Linux, OAuth2, JWT Security, Jio Cloud

Professional Experience

Sr. Software Engineer – Technology Delivery – IDBI Intech, Navi Mumbai - Dec 2023 – Present

- Spearheaded the end-to-end design and implementation of debit card reconciliation modules for NFS, RUPAY, Mastercard, and VISA
- Migrated legacy Spring MVC apps to Spring Boot java version 21.
- Built dashboards with JavaScript; managed access via Citrix and IDBI Cloud. Used log4j for logging debugging and Junit for testing
- Developed responsive front-end interfaces using React.js, JavaScript, HTML, and CSS to enhance user experience and optimize application performance.
- Created interactive dashboards using JavaScript and React.js; managed secure access via Citrix and IDBI Cloud. Used Log4j for logging/debugging and JUnit for unit testing.
- Optimized front-end performance in React applications using component reusability, lazy loading, and efficient rendering techniques.

Java Developer – Takira Solution - Aug 2022 – Nov 2023

- Implemented **system integrations** between internal applications and external services using REST APIs and custom scripts Migrated legacy
- BY Using Caching reduced manual processing effort by 40% by automating approval workflows using intra-mart BPM capabilities.
- Built system integrations between internal enterprise systems and external services using REST APIs and secure data exchange mechanisms
- Developed **JavaScript-based custom scripts** for form handling, data validation, masking sensitive data, and runtime error handling.
- Implemented system integrations between internal applications and external services using REST APIs, custom scripts, and Angular-based front-end modules
- Developed JavaScript and Angular-based custom scripts/components for form handling, data validation, masking sensitive data, and runtime error handling.

Jr Java Developer-Uno tech Pvt Dec 2021 – Aug 2022

- Worked on UPI Switch, UDIR, and Aadhaar services. Implemented Aadhaar OTP and validation flows
- Handled UPI-Lite, debugging, Kafka messaging. Ensured secure coding practices using Fortify
- Developed detailed software code while ensuring that their Integrated HSM configurations use native API
- Optimizing data structures and logic, Spring Boot, Java and XSLT. Support and advise QA team testing in various environments
- Developed AEPS and banking modules. Integrated HSM APIs; handled banking encryption flows
- Designing and developing web applications, as well as strategic road maps documenting and presenting API specifications
- Wrote SQL queries for updating data into the oracle using MySQL database, testing, and delivery of high-quality deliverables

Projects

Worked on large-scale banking and financial applications including, Payment Systems:

• Unified Payments Interface (UPI Switch) & UPI LITE
• I-RECON - NFS, RUPAY, Mastercard, and VISA(ATM-POS)-Reconciliation
• The **Intra-mart framework-** Net-Banking|Mobile Banking
• Unified Dispute & Issue Resolution (UDIR)
• IMPS, NETC (FASTAG), AEPS & Internet Banking Systems (ISO8583)

Education

- B.Sc. (Information Technology) – Vidyalankar, Mumbai | University of Mumbai -2020
- Computer Engineering Diploma— Vidyalankar, Mumbai |University of Mumbai-2018

Languages

English, Hindi, Marathi
